

**Drive on  
Therapy™**

# **Safe travel for people with a disability or medical condition**

Services overview

Supporting individuals and their families to navigate driving with clarity, confidence and care.

# **Welcome to Drive On Therapy**

We believe in empowering every individual to achieve their driving goals, with a personalised and collaborative approach.

## **Comprehensive, person-centred services**

We offer a comprehensive suite of occupational therapy driving services designed to cater to diverse transport needs.

Assisting clients and  
their families through  
all stages of driving.

# Services overview

## **Fitness to drive assessments**

Determine whether an individual is safe to continue or return to driving after the onset or progression of a medical condition.

## **Potential to drive assessments**

Evaluate the readiness of an individual with a disability to begin learning to drive and what supports may be beneficial to build their driving abilities.

## **Vehicle modification assessments**

Determine whether vehicle modifications may be necessary for an individual to safely access or drive a motor vehicle. This includes wheelchair accessible vehicles and other vehicle modifications to support individuals as a driver or passenger.

## **Driving rehabilitation and capacity building**

Expert occupational therapy support to build driving capabilities following a driving assessment.
