

**Drive on  
Therapy™**

**Vehicle  
modifications  
assessments**

Supporting safe,  
independent travel  
for people with a  
disability

We exist to restore the ability to move freely and empower individuals to control their own journeys.

Vehicle modifications may provide improved driving, vehicle access and transportation for people with a disability.

- ✓ **Wheelchair and scooter hoists**
- ✓ **Hand controls and driving aids**
- ✓ **Wheelchair accessible vehicles**

Access the community  
with maximum safety and  
independence.

# What is involved

## + **Functional assessment**

An Occupational Therapy Driving Assessment will be undertaken to evaluate function that is relevant for safe driving. This will determine if vehicle modifications are beneficial to support community mobility, whether this is for driving or passenger transportation.

## + **Equipment trials**

Equipment trials will take place to determine the most appropriate modifications to the vehicle to support the individual with their transport needs.

## + **Driving rehabilitation**

Driving rehabilitation may follow the prescription of equipment to ensure the individual is driving to a safe licensing standard and can operate their vehicle as intended.
