

Driving Vision Assessment

To be completed by Optometrist or Ophthalmologist

| Client Details | |
|----------------|--|
| Name | |
| Date of Birth | |
| Address | |

Visual Acuity (Snellen)

| Type | Right Eye | Left Eye | Binocular |
|---------|-----------|----------|-----------|
| Unaided | | | |
| Aided | | | |

Peripheral Vision

| Criteria | Right Eye | Left Eye |
|------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Note Limitations | | |
| Binocular visual field has a horizontal extent of $\geq 110^\circ$ within 10° above and below the midline | <input type="checkbox"/> Yes <input type="checkbox"/> No | |
| Presence of visual field defect <i>Please note if applicable</i> | <input type="checkbox"/> L / R Quadrantanopia <input type="checkbox"/> L / R Hemianopia <input type="checkbox"/> Other: | |
| Assessment Used | <input type="checkbox"/> Medmont <input type="checkbox"/> Esterman <input type="checkbox"/> Humphrey <input type="checkbox"/> Confrontation <input type="checkbox"/> Other: | |

Eye Movements

| | |
|---------------------------------|-----------------------------------|
| <input type="checkbox"/> Normal | <input type="checkbox"/> Impaired |
| Comments: | |

Vision Conditions

Please note any of the following that apply.

| | | |
|------------------------------------|-----------------------------------|-------------------------------------|
| <input type="checkbox"/> Diplopia | <input type="checkbox"/> Scotoma | <input type="checkbox"/> Strabismus |
| <input type="checkbox"/> Nystagmus | <input type="checkbox"/> Glaucoma | <input type="checkbox"/> Cataracts |
| <input type="checkbox"/> Other: | | |

Management of Vision Conditions

Please provide advice on management for any vision conditions including recommended period of visual reassessment.

Summary of 2022 Austroads Medical Standards for Assessing Fitness to Drive – Section 10

Please refer to the guidelines online for detailed information: <https://austroads.gov.au/>

| Condition | Private Licensing Standards |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Visual Acuity | <p>A person is not fit to hold an unconditional licence:</p> <ul style="list-style-type: none"> If uncorrected visual acuity in the better eye or with both eyes together is worse than 6/12 <p>A conditional licence may be considered by the driver licensing authority subject to periodic review if the standard is met with corrective lenses.</p> <p>Some discretion is allowed in application of the standard by an Optometrist/Ophthalmologist. However, a driver licence will not be used with visual acuity in the better eye is worse than 6/24.</p> |
| Visual Fields | <p>A person is not fit to hold an unconditional licence:</p> <ul style="list-style-type: none"> If the binocular visual field does not have a horizontal extent of at least 110 degrees within 10 degrees above and below the horizontal midline; or If there is any significant visual loss (scotoma) within a central radius of 20 degrees of the foveal fixation or other scotoma likely to impede driving performance; or If there is any significant visual field loss (scotoma) with more than 4 contiguous spots within a 20-degree radius from fixation. <p>A conditional licence may be considered by the driver licensing authority subject to annual review, considering the nature of the driving task and information provided by the treating Optometrist or Ophthalmologist.</p> |
| Monocular vision | <p>A person is not fit to hold an unconditional licence:</p> <ul style="list-style-type: none"> if the person is monocular <p>A conditional licence may be considered by the driver licensing authority subject to two-yearly review, considering the nature of the driving task and information</p> |

| | |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <p>provided by the treating Optometrist or Ophthalmologist as to whether the following criteria are met:</p> <ul style="list-style-type: none"> the visual acuity in the remaining eye is 6/12 or better, with or without correction; and the visual field in the remaining eye has a horizontal extent of at least 110 degrees within 10 degrees above and below the horizontal midline. |
| Diplopia | <p>A person is not fit to hold an unconditional licence:</p> <ul style="list-style-type: none"> if the person experiences any diplopia (other than physiological diplopia) when fixating objects within the central 20 degrees of the primary direction of gaze. <p>A conditional licence may be considered by the driver licensing authority subject to annual review, considering the nature of the driving task and information provided by the treating Optometrist or Ophthalmologist as to whether the following criteria are met:</p> <ul style="list-style-type: none"> The condition is managed satisfactorily with corrective lenses or an occluder; and The person meets other criteria as per this section, including visual fields <p>The following licence condition may apply if corrective lenses or an occluder prevents the occurrence of diplopia:</p> <ul style="list-style-type: none"> Corrective lenses or an occluder must be worn while driving. A 3-month non-driving period applies for the use of an occluder, to re-establish depth perception. |
